# CONTENTS OF VOLUME 160

NUMBER 1, JULY 1993

HARUKI ISHIKAWA AND OKITSUGU KAJIMOTO. Vibrational Analysis of $SiH_2(\tilde{A}^1B_1)$ ..... 1

GEORGE W. ADAMSON, XINSHENG ZHAO, AND ROBERT W. FIELD. The HCO $\tilde{B}^2A' \leftrightarrow \tilde{X}^2A'$ System: Fluorescence Excitation and Stimulated Emission Pumping Spectra ..... 11

PER JENSEN AND IGOR N. KOZIN. The Potential Energy Surface for the Electronic Ground State of $H_2Se$ Derived from Experiment ..... 39

K. K. LEHMANN, F. J. LOVAS, AND R. D. SUENRAM. Structure and Dipole Moment of $(CF_3)_3CC{\equiv}CH$ ..... 58

S. P. BELOV, M. YU. TRETYAKOV, I. KLEINER, AND J. T. HOUGEN. The Second Torsional State of Acetaldehyde ..... 61

GEORGE THOMPSON AND ARTHUR G. MAKI. Infrared Spectrum of Cyanogen Iodide (ICN) ..... 73

WAFAA M. FAWZY. Electron-Spin Electron-Spin, Electron-Spin Rotation Interactions, and Quartic Centrifugal Distortion Terms for an Open-Shell Diatomic Molecule van der Waals Bonded to a Closed Shell Partner .... 84

A. V. BURENIN, L. FUSINA, AND M. CARLOTTI. Rotational Spectrum of the $PH_3$ Molecule in the $v_2 = 1$ Vibrational State ..... 97

J. M. L. MARTIN, TIMOTHY J. LEE, AND PETER R. TAYLOR. An Accurate ab Initio Quartic Force Field for Formaldehyde and Its Isotopomers ..... 105

LISE HEDBERG AND IAN M. MILLS. ASYM20: A Program for Force Constant and Normal Coordinate Calculations, with a Critical Review of the Theory Involved ..... 117

J. KOPUT. The ab Initio Prediction of Energy Levels of Large-Amplitude Motions for Disiloxane ..... 143

J. C. LÓPEZ, J. L. ALONSO, G. WLODARCZAK, AND J. DEMAISON. The Millimeter-Wave Spectrum and ab Initio Calculations of 2,5-Dihydrofuran 158

XIAOWEI ZHAN, OLAVI VAITTINEN, AND LAURI HALONEN. High-Resolution Photoacoustic Study of Acetylene between 11 500 and 11 900 $cm^{-1}$ Using a Titanium:Sapphire Ring Laser ..... 172

ROMOLA D'CUNHA, Y. A. SARMA, G. GUELACHVILI, R. FARRENQ, AND K. NARAHARI RAO. Analysis of the $^{13}C^{12}CH_2$ Bands in the FTIR Spectrum of Acetylene ..... 181

C. KOSMIDIS, A. BOLOVINOS, AND P. TSEKERIS. Polarization Measurements of the Resonant Multiphoton Ionization Spectrum of the 3*s* Rydberg States of Monomethylpyridines ..... 186

B. I. ZHILINSKII, SVEND BRODERSEN, AND MORTEN MADSEN. The Pattern of Clusters in Isolated Vibrational Components of $CF_4$ and the Semiclassical Model ..... 192

JUN SAKAI AND MIKIO KATAYAMA. Diode Laser Spectroscopy of Acetylene: $2\nu_1 + \nu_2 + \nu_3$ Region at 0.85 $\mu$m ..... 217

L. H. COUDERT. Analysis of the Rotational Levels of $SiC_2$ ..... 225

HAUKE HARDER, HANS-WERNER NICOLAISEN, HELMUT DREIZLER, AND HEINRICH MÄDER. Quadrupole Transitions in $CF_3Br$ Investigated by Two-Dimensional Fourier Transform Spectroscopy in the Microwave-Radiofrequency Range ..... 244

GHISLAIN BLANQUET, JACQUES WALRAND, AND JEAN-PIERRE BOUANICH. Diode-Laser Measurements of $N_2$-Broadening Coefficients in the $\nu_3$ Band of $CH_3{}^{35}Cl$ ..... 253
YUNJIE XU, WOLFGANG JÄGER, M. C. L. GERRY, AND ILONA MERKE. The Rotational Spectrum of Bromoacetonitrile, Measured with Stark Modulated and Microwave Fourier Transform Spectrometers ..... 258
J.-M. FLAUD, A. PERRIN, L. M. SALAH, W. J. LAFFERTY, AND G. GUELACHVILI. A Reanalysis of the (010), (020), (100), and (001) Rotational Levels of $^{32}S^{16}O_2$ ..... 272
Š. URBAN AND K. M. T. YAMADA. A Breakdown of the Watson-Type Hamiltonian for Some Asymmetric Top Molecules ..... 279
M. BARNES, P. G. HAJIGEORGIOU, AND A. J. MERER. Rotational Analysis of the $A'^5\Delta$–$X^5\Pi$ Transition of CrO ..... 289

NOTE

IVANA PAIDAROVÁ, VLADIMÍR ŠPIRKO, AND JENS ODDERSHEDE. The Temperature Dependence and Isotope Shift of Nitrogen Shielding in Ammonia ..... 311

NUMBER 2, AUGUST 1993

DAVID W. FERGUSON, K. NARAHARI RAO, MICHAEL E. MICKELSON, AND LEE E. LARSON. An Experimental Study of the 4–0 and 5–0 Quadrupole Vibration Rotation Bands of $H_2$ in the Visible ..... 315
V. G. AVETISOV, A. I. NADEZHDINSKII, A. N. KHUSNUTDINOV, P. M. OMAROVA, AND M. V. ZYRIANOV. Diode Laser Spectroscopy of Water Vapor in 1.8 $\mu$m: Line Profile Measurements ..... 326
J. M. HURE AND E. ROUEFF. Oscillator Strengths for IR Rovibrational Transitions of CO ..... 335
L. DORE, G. CAZZOLI, M. E. CHARRO, C. DEGLI ESPOSTI, G. BUFFA, AND O. TARRINI. Millimeter and Submillimeter Spectroscopy of $NO^{35}Cl$: $J$ Dependence of $N_2$ and $O_2$ Broadenings ..... 345
D. ZOLANDZ, S. N. YALIRAKI, W. KLEMPERER, S. CAROCCI, P. MINGUZZI, M. TONELLI, AND A. DI LIETO. A Search for Nuclear Quadrupole Effects on the Dipole Moment of Methyl Iodide ..... 351
S. CAROCCI, P. MINGUZZI, M. TONELLI, AND A. DI LIETO. The Electric Dipole and the Nuclear Quadrupole Moment of Methyl Bromide in the Ground Vibrational State ..... 359
S. BOUAZZA, A. BARBE, J. J. PLATEAUX, J.-M. FLAUD, AND C. CAMY-PEYRET. The $3\nu_1$ and $\nu_1 + 3\nu_3 - \nu_2$ Absorption Bands of $^{16}O_3$ ..... 371
J.-M. FLAUD, C. CAMY-PEYRET, A. PERRIN, V. MALATHY DEVI, A. BARBE, S. BOUAZZA, J. J. PLATEAUX, C. P. RINSLAND, M. A. H. SMITH, AND A. GOLDMAN. Line Parameters for Ozone Hot Bands in the 3.3-$\mu$m Spectral Region ..... 378
J.-M. GUILMOT, M. GODEFROID, AND M. HERMAN. Rovibrational Parameters for *trans*-Nitrous Acid ..... 387
J.-M. GUILMOT, F. MÉLEN, AND M. HERMAN. Rovibrational Parameters for *cis*-Nitrous Acid ..... 401

T.-J. WHANG, C.-C. TSAI, W. C. STWALLEY, A. M. LYYRA, AND LI LI. Spectroscopic Study of the $Na_2$ $2^3\Sigma_g^+$ State by cw Perturbation-Facilitated Optical–Optical Double-Resonance Spectroscopy ..... 411
ANNE M. ANDREWS, LASZLO NEMES, SUSAN L. MARUCA, KURT W. HILLIG II, ROBERT L. KUCZKOWSKI, AND JOHN S. MUENTER. Electric Dipole Moments of Rare Gas–Carbonyl Sulfide van der Waals Complexes ..... 422
ANDREAS F. RUCKSTUHL, WERNER A. STAHEL, AND KURT DRESSLER. Robust Estimation of Term Values in High-Resolution Spectroscopy: Application to the $e^3\Sigma_u^+ \rightarrow a^3\Sigma_g^+$ Spectrum of $T_2$ ..... 434
A. DE LORENZI, S. GIORGIANNI, A. GAMBI, R. VISINONI, AND S. GHERSETTI. High-Resolution FTIR Spectrum of $CF_2{=}CH_2$ near 3060 $cm^{-1}$: Rovibrational Analysis of the Methylene Symmetric Stretching ..... 446
A. PERRIN, J.-M. FLAUD, C. CAMY-PEYRET, A. GOLDMAN, F. J. MURCRAY, R. D. BLATHERWICK, AND C. P. RINSLAND. The $\nu_2$ and $2\nu_2 - \nu_2$ bands of $^{14}N\ ^{16}O_2$: Electron Spin–Rotation and Hyperfine Contact Resonances in the (010) Vibrational State ..... 456
XIAOWEI ZHAN AND LAURI HALONEN. High-Resolution Photoacoustic Study of the $\nu_1 + 3\nu_3$ Band System of Acetylene with a Titanium:Sapphire Ring Laser ..... 464
M. LE GUENNEC, J. DEMAISON, G. WLODARCZAK, AND C. J. MARSDEN. Rotational Spectra of $CH_2DC{\equiv}CH$ and $CH_3C{\equiv}CD$: Experimental and ab Initio Equilibrium Structures of Propyne ..... 471
CHUN HE, J. PLÍVA, C. M. FAUST, M. EL-SHAKRE, L. P. GOLD, AND R. A. BERNHEIM. High-Resolution Infrared Spectroscopy and Analysis of the Methyl Group Stretching ($\nu_1$) of $CH_3NC$ ..... 491
NEHA S. SULE, R. J. KSHIRSAGAR, AND V. A. JOB. The $\nu_9$ Band of Propyne-$d_3$ 502
CHEN CIPING AND D. A. RAMSAY. High-Resolution Study of the $v = 11$ to 18 Levels in the Ground State of Oxygen ..... 512
CHRISTINE ROCHE, JEAN-PAUL CHAMPION, AND ALAIN VALENTIN. The Vibrational Ground State of $^{12}CHD_3$ ..... 517
A. PERRIN, J.-M. FLAUD, C. CAMY-PEYRET, V. JAOUEN, R. FARRENQ, G. GUELACHVILI, Q. KOU, F. LE ROY, M. MORILLON-CHAPEY, J. ORPHAL, M. BADAOUI, J.-Y. MANDIN, AND V. DANA. Line Intensities in the 11- and 7.6-$\mu$m Bands of $HNO_3$ ..... 524
W. QUAPP, S. ALBERT, B. P. WINNEWISSER, AND M. WINNEWISSER. The FT-IR Spectrum of HC $^{15}NO$: The $\nu_1$, $\nu_2$, $2\nu_3$, and $\nu_2 + \nu_3$ Band Systems .... 540
A.-M. TOLONEN, M. KOIVUSAARI, R. PASO, J. SCHRODERUS, S. ALANKO, AND R. ANTTILA. The Infrared Spectrum of Methyl Cyanide between 850 and 1150 $cm^{-1}$: Analysis of the $\nu_4$, $\nu_7$, and $3\nu_8^1$ Bands with Resonances ..... 554
M. KOIVUSAARI, A.-M. TOLONEN, R. PASO, J. SCHRODERUS, AND R. ANTTILA. The $2\nu_8$ Band of $CH_3CN$ ..... 566
R. S. RAM, C. N. JARMAN, AND P. F. BERNATH. Fourier Transform Infrared Emission Spectroscopy of a New $A^4\Pi_i$–$X^4\Delta_i$ System of CoO ..... 574

NOTES

K. BALASUBRAMANIAN, D. ANDRAE, M. DOLG, H. STOLL, AND H. PREUß. Comparison of Spectroscopic Constants of OsH from Different ab Initio Calculations ..... 585

L.-E. BERG, A. HISHIKAWA, A. KARAWAJCZYK, AND T. OLSSON. Lifetime Measurements of Excited Molecular States Using a Ti:Sapphire Laser: Radiative Lifetimes of the $A^2\Pi$, $B^2\Sigma^+$, and $C^2\Pi$ States of BaCl ..... 593
P. JAKOB, K. SUGAWARA, AND J. WANNER. Rotational Analysis of the $C^1\Pi$–$X^1\Sigma^+$ Band System of $^{63}$CuF ..... 596
F. MÉLEN, M. HERMAN, G. Y. MATTI, AND D. M. MCNAUGHTON. Fourier Transform Jet Spectrum of the $\nu_7$ Band of $C_2H_6$ ..... 601
AUTHOR INDEX FOR VOLUME 160 ..... 604
SUBJECT INDEX FOR VOLUME 160 ..... 606

# JOURNAL OF MOLECULAR SPECTROSCOPY

## INFORMATION FOR AUTHORS

Manuscripts describing original work in areas of molecular spectroscopy should be submitted to K. Narahari Rao, Department of Physics, The Ohio State University, Columbus, Ohio 43210.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Molecular Spectroscopy* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. As in the past, the Publisher will continue to grant all reasonable requests for permission to reproduce material from contributions appearing in the Journal. However, it is recommended that such requests be first made to the Editor for appropriate action.

**Form of Manuscripts.** Manuscripts in duplicate should be typewritten with wide margins on high-quality bond paper using double or triple spacing throughout. Copies should include figures, tables, etc.

Each page of the manuscript should be numbered. The first page should contain the article title, author's name, and affiliation. At the bottom of this page, the number of manuscript pages, figures, and tables should be noted. The second page should contain a proposed running head of less than thirty-five characters. It should also contain the name and complete mailing address of the person to whom proofs are to be sent. The third page should contain an abstract.

"Letters to the Editors" will be devoted to the announcement of important results with a minimum of delay. "Notes" will also be published as speedily as possible. Contributions to this section containing "Letters to the Editors" and "Notes" should not exceed 1½ printed pages, including figures, equations, and tables. They should follow the style and form used for manuscripts except that they need not be accompanied by abstracts.

**List of Symbols.** Authors should submit a complete list of symbols identifying each for the printer. This list will not appear in print.

**Tables.** Tables are to be numbered consecutively with Roman numerals. The table numbers and titles should be listed on a separate sheet. *Tables will be reproduced as camera-ready copy.* Therefore, they should be carefully and clearly typed since, except for reduction in size, they will appear exactly as submitted. If the tables will be prepared using a word processor or computer, it is recommended that a daisy wheel printer be used. If a daisy wheel printer is unavailable and you will be using a dot matrix printer, it is important that the density of the dots (i.e., the number of dots in the matrix) be sufficient that the numbers do not appear broken. Short tables of one or two pages in length should be typed double-spaced and planned to fit an area of 5 × 8¼ in. after reduction of no more than 40%. Lengthy tables should be typed single-spaced and divided into sections so that each section can fit in the area indicated. *Repeat column headings when dividing tables.* No corrections can be inserted after the line cuts have been made. Do not use a comma to separate groups of 3 digits; merely use a space. For instance: 2,526,000 should be typed 2 526 000. Insert a zero in front of a decimal point when it applies. For instance, instead of .36, use 0.36.

Footnotes to tables should be identified by superscript letters and placed at the bottom of the page containing the table. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

**Equations.** Equations should be numbered consecutively with the number placed in parentheses to the right of the equation. Reference to equations should use the form Eq. (3).

**References.** References should be cited in the text by underlined number in parentheses (in order of appearance). The literature cited should appear on a separate page (double-spaced) and should be listed consecutively according to reference number. Following the reference number, the author's initials, last name, journal name, volume, inclusive pagination, and year (in parentheses) should be listed in that order. Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index,* 1985. For book references give the author's name, name of book, editor's name (if any), edition (if other than first), chapter or page number, publisher's name, place, and year of publication.

**Figures.** All illustrations should be numbered as figures in sequence with Arabic numerals. Each figure should have a descriptive legend and these should be listed on a separate sheet. Figures should be planned to fit the proportion of the printed page (5 × 8¼ inches), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50 to 60 percent. Illustration copy should measure no larger than 12 × 15 inches. Each figure should be identified in a margin with the name of the journal, author's name, and figure number. Photocopies of figures are not acceptable. Illustrations in color can be accepted only if the authors defray the cost.

**Proofs.** Proofs will be sent to the author, with reprint order forms. Fifty reprints of each article are granted free of charge, and additional copies may be purchased. Authors will be charged for excessive alterations.

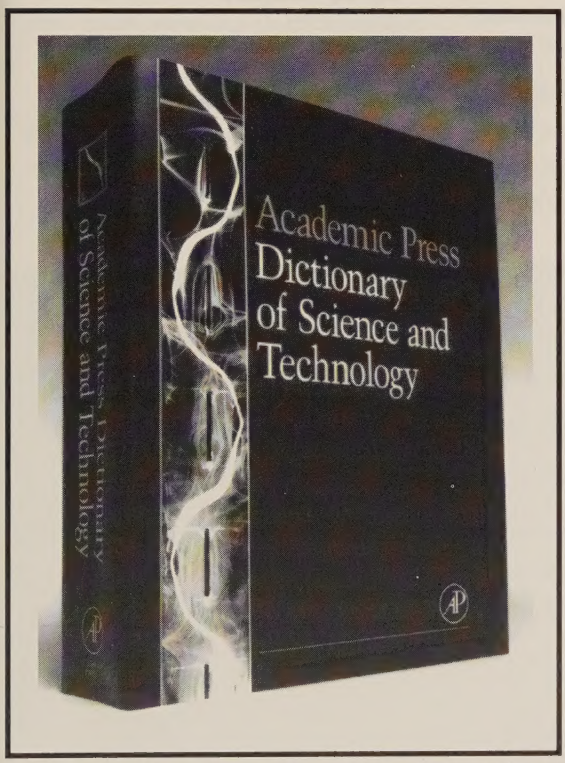
**Personal Computer Disks.** Manuscripts may be submitted to *Journal of Molecular Spectroscopy* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material and art must also be prepared as camera-ready copy; see the sections on Tables and Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).

# The New Standard of Excellence.

The most comprehensive, authoritative scientific dictionary now available, the **Academic Press Dictionary of Science and Technology** offers you, in one volume, the largest collection of scientific terms available in any single reference source. Containing complete, practical definitions for 133,000 words (not counting abbreviations), the **Dictionary** covers key terminology in 124 fields of science and technology—including Molecular Biology, Computer Science, Physics, Engineering, Chemistry, Ecology, Behavior, Geophysics, Veterinary Science, Mathematics, Astronomy, Biotechnology, and numerous other fields.



September 1992, 2432 pp., $115.00/ISBN: 0-12-200400-0

Prices subject to change without notice. ©1993 by Academic Press, Inc. All Rights Reserved. LK/CEP/ST—41013.

## Key Features Include

- 133,000 fully-defined entries—more than any other scientific dictionary
- Complete coverage of 124 fields of science ranging from Acoustics to Zoology
- Single volume, large $8\frac{1}{2}$" x 11", double-column format for easy access
- Cutting-edge definitions in such dynamic fields as Artificial Intelligence and Biotechnology
- More medical terms than any other general scientific dictionary now available
- More coverage of subfields of medicine, including rapidly growing disciplines such as Oncology, Radiology, Hematology, Cardiology, and Toxicology
- More than 2000 detailed illustrations and technical photographs, including 24 pages of color plates
- Pronunciation guides for difficult or phonetically irregular terms
- Complete appendix of frequently consulted scientific data, including the periodic table, standard weights and measures, and a Chronology of Science

Another distinctive feature of the **Dictionary** is its 124 "Windows." These boxed essays are written by leading scientists in the field, such as Michael DeBakey, Stephen Jay Gould, Joshua Lederberg, Arthur Kornberg, Linus Pauling, Roger Revelle, and Rosalyn Yalow, each of whom offers a brief introduction to his or her area of expertise. Presenting practical, concise information on each discipline, the "Windows" help make the terminology easier to understand.

## The Only Source You Need for Scientific Terminology

If your library, institution, or corporation serves practicing scientists and professionals in any scientific field—engineers, computer professionals, and other technical personnel; high school, college, and graduate students; writers, researchers, and educators working with a scientific vocabulary; or general readers interested in science—then the **Academic Press Dictionary of Science and Technology** is the only scientific dictionary you need. The definitions are clear and accessible to the non-specialist, yet provide all the technical information the specialist requires.

Set a new standard of excellence by adding the **Academic Press Dictionary of Science and Technology** to your reference collection.

*It will become your reference of choice.*

*An International Journal Designed for the Diverse Community of Users and Developers of Novel X-Ray Imaging and Analysis Techniques*

# Journal of X-Ray Science and Technology

Editor-in-Chief
**Larry Knight**
*Brigham Young University, Provo, Utah*

The **Journal of X-Ray Science and Technology** is designed to provide scientists and engineers with a single literature source covering new developments in the field of x-ray imaging and analysis techniques. Reports of original research and timely reviews of the best technical and esthetic quality will be published.

## Research Areas Include

- Applications: analytical, nondestructive testing, microelectronics, biological/medical imaging, x-ray astronomy, materials and surface science
- Interaction of x rays with matter: x-ray phenomena and optical constants
- Sources: synchrotron-generated x rays, x-ray lasers, laser-produced plasmas, novel solid sources
- Optical elements: grazing incidence optics, multilayer mirrors, zone plates, gratings
- Optical instruments: interferometers, spectrometers, microscopes, telescopes, microprobes
- Detectors: CCD arrays, position-sensitive detectors
- Signal processing: coded imaging, tomography
- Related topics and future trends
